

Muhammad Reizalfani Baharudin

Production Technician

Profile

Manufacturing professional with over 7 years of experience in production systems and continuous improvement. Proven expertise in supporting production operations through machine inspection systems, implementing both conventional and digital improvement strategies to enhance efficiency and reliability. Strong background in electrical and mechanical design, with advanced skills in data analysis and visualization to drive process optimization.

Adept at bridging technical knowledge with leadership and communication abilities, ensuring effective collaboration across teams. Recognized for delivering innovative solutions that improve productivity, reduce downtime, and support sustainable manufacturing growth.

Work Experience

2019 – 2020

PT Denso Indonesia Bekasi Plant

Kougyo Senmon / Denso Academy

Completed intensive technical and manufacturing excellence training program modeled after the Japanese Kosen education system, mastering advanced concepts, industrial automation, and robotics.

2020 – 2021

PT Denso Indonesia Fajar Plant

Production Operator – Spark Plug Iridium

Mastered and executed all standard operating procedures (SOP) across multiple production processes to ensure flexible line support as a Multiskill Operator.

Maintained strict adherence to 5S, safety standards, and 100% quality compliance during daily output generation.

2021 – Present

PT Denso Indonesia Fajar Plant

Technician / Einsteller – SP Iridium & Packing Exp.

Transitioned into a broader operational scope within the production department, focus on stabilizing line efficiency and preparing system readiness for upcoming automation projects. Develop New product, Control KPI Production, Create Improvement, Cost Reduction Activity, Maintain packing process.

Project Experience

- IoT System Machine Learning
- E-Dekidaka System
- 3 Point Check System Packing Ir
- Un-Lot System
- Traceability System
- Camera OCR Read Label 2T/3T
- Camera AI Check
- Weight Scale Confirmation
- SOS Project
- Early Detection System
- Control Lifetime Tool System
- AP+DN7 Monitoring System

Achievement

2020 | The Best & Most SS FY '20, 2nd Runner UP Basic Maintenance Skill Competition

2021 | The Best & Most SS FY '21, 4th Winner Presentation SS AOP

2022 | The Best & Most SS FY '22, 1st Winner QCC Denso Indonesia Group

2023 | The Best & Most SS FY '23, 1st Winner QCC Denso Regional Asia

2024 | Positive appreciation Group QCC In Global Sharing Denso Japan

2025 | Gold Medal International Conference Quality (ICQ) in Tokyo Japan

- Adelia Residence Blok D3, Setu, Bekasi

Education

- KOSEN (DENSO Academy)**
Certificate in Manufacture Engineering
Completed in 2020
Score : 86.34
- State Polytechnic of Jakarta**
Diploma I Electronics Industry Engineering
Completed in 2020
GPA : 3.76

Skill

- PLC Programming
- Electrical Installation
- Script Programming
- Digitalized System
- Communication Skill
- QCC Skill
- Microsoft Office Application
- Database system
- Middleware Communication Machine
